Value from Innovation

SELECTION OF **TECHNOLOGIES**

LCI (LINKED COLOR IMAGING)

Increased contrast in red colour leads to improved visibility of abnormalities, inflammation and delineation.

BLI (BLUE LIGHT IMAGING)

The combination of special light wavelengths results in improved contrast imaging for characterisation.

CAD EYE

This function, developed utilising AI technology, supports colonic polyp detection and characterisation during colonoscopy.

SCALE EYE

Virtual scale function designed to aid endoscopists in estimating the size of lesions in the colon.

COLOASSIST PRO

Endoscope visualisation function which displays the configuration of the endoscope in real-time.

ONE-STEP CONNECTOR

Easy to plug in with an integrated wireless power supply to provide high speed transmission of data.

G7 GRIP

Grip is designed to have a comfortable feel to improve performance and reduce stress.

WATER JET TECHNOLOGY

The Water Jet function aids constant visualisation for both diagnostic and therapeutic procedures.

COLOASSIST ADJUST

Combines the 3 features "Flexibility Adjuster" with different levels of stiffness, "Advanced Force Transmission" and "Adaptive Bending", intended to be helpful for the manoeuvrability of the endoscope.

MULTI ZOOM TECHNOLOGY

Easy-to-control optical magnification in stepwise or continuous magnification mode.

HD TECHNOLOGY

Combine equipment displaying this logo to ensure that you view HDTV images on your monitor.

COLONOSCOPES

CAD EYE is a function to support colonic polyp detection and characterisation during colonoscopy, utilising AI technology. CAD EYE is compatible with all 700 series

colonoscopes and the ELUXEO (VP/BL-7000) and ELUXEO Lite (EP-6000) system*². For further information visit www.cadeye.com.
